

COMPACT WASH BASIN

PRODUCT CODE

245

November 2006

Special Features

- ▲ HYGIENIC VANDAL RESISTANT DESIGN
- ▲ NEAT COMPACT SIZE
- ▲ COMPLETE WITH APRON SUPPORT

Description

The robust and neat compact wash basin is ideal for installing in areas subject to health regulations relating to hand washing, but where only a limited space is available. The basin is also suitable for use in individual toilet facilities in particular those used by disabled people.

Construction

The compact wash basin is manufactured in one piece without joints or crevices from grade 304 stainless steel, with all exposed surfaces polished to a satin finish. A rear upstand is incorporated as an integral part of the basin top. The compact wash basin is produced with two tap holes and is supplied as standard with an apron support and a combined waste and overflow fitting, plug and chain.

Options

- ▲ Non-standard waste fitting.
- ▲ Stainless steel tap hole blank.
- ▲ Water controllers, taps and valves (see catalogue section 6).

Technical Specification: Compact Wash Basin

Waste Outlet

The compact wash basin is supplied as standard with a 32 mm (1¼ in) BSP combined waste and overflow fitting, plug and chain.

As an alternative to the standard waste fitting the following non-standard fitting can be supplied:

32 mm (1¼ in) BSP combined waste and overflow, captive plug.

Tap Hole Positions

The compact wash basin is produced with two tap holes. An optional stainless steel tap hole blank is available if only one tap hole is to be used.

Tap Hole Sizes

The standard size is 30 mm diameter.
